SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	01/16/2007	PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

**Office Action Summary**

Application No.

10/690,860

Applicant(s)

WILLIAMS ET AL.

Examiner

LEYNNA T. HA

Art Unit

2135

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-31 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-31 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

1. Claims 1-33 is pending.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. **Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ryan, et al. (US 6,374,036), and further in view of Fukushima (US 6,388,638).**

**As per claim 1:**

Ryan discloses a method for protecting digital content, comprising:

providing digital content organized by frames to a rendering unit; and

**(col.5, lines 41-46)**

altering a portion of the frames of the digital content **(col.6, lines 45-51)**

within the rendering unit in response to tags in a data stream provided thereto.

**(col.5, lines 64-67)**

Ryan discloses that a hacker could not easily modify a video signal to force a particular attribute value without seriously degrading the entertainment value of the program. Thus, it is obvious that Ryan's intention is to prevent

viewing of the video if modifications were made. Such that a watermark is need to allow the user to view the recorded version (col.7, lines 5-12 and col.6, lines 45-50). Thus, it is obvious Ryan discloses the video frames are visually perceptible in a recorded version thereof. However, Ryan fails to discuss the alterations of the digital content are not visually perceptible for real-time display.

Fukushima discloses displaying images that have been recorded and able to change its display contents (col.1, lines 5-8 and 30-35). Fukushima discusses the prior art cannot display image in real time due to heavy calculation load resulting in unnatural images which intermittently displayed frame by frame. This requires a special purpose processor and circuit, thus would be costly and the apparatus scale increases (col.1, lines 42-47).

Therefore, it would have been obvious for a person of ordinary skills in the art at the time of the invention the alterations of the digital content are not visually perceptible for real-time display but are visually perceptible in a recorded version thereof as disclosed by Fukushima because due to heavy calculation load resulting in unnatural images which intermittently displayed frame by frame and requires a special purpose processor and circuit (col.1, lines 42-47).

**As per claim 2: see Ryan on col.5, lines 41-45;** discloses the method, according to claim 1, wherein the step of altering comprises randomly selecting frames for alteration.

**As per claim 3: see Ryan on col.7, lines 10-20;** discloses the method,

according to claim 1, wherein altering comprises removing at least one object from a frame.

**As per claim 4: see Ryan on col.7, lines 18-20;** discloses the method, according to claim 1, wherein altering comprises relocating at least one object in a frame.

**As per claim 5: see Ryan on col.7, lines 18-20;** discloses the method, according to claim 1, wherein altering comprises adding at least one object to a frame.

**As per claim 6: see Ryan on col.2, lines 40-41 and col.5, lines 64-67;** discloses the method, according to claim 5, wherein the rendering unit is a graphics processing unit.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**3. Claims 7-14 and 20-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Ryan, et al. (US 6,374,036).**

**As per claim 7:**

Ryan discloses a device for protecting digital content, comprising:

a rendering unit configured to detect tags in a data stream (**col.3, lines 43-45**) and to associate the detected tags with commands for altering image content. (**col.5, lines 64-67 and col.6, lines 45-51**)

**As per claim 8: see Ryan on col.6, lines 28-38;** discloses the device, according to claim 7, wherein the rendering unit includes a table for storing symbols used when associating the detected tags with the commands.

**As per claim 9: see Ryan on col.6, lines 39-42;** discloses the device, according to claim 8, wherein the rendering unit comprises memory for storing overlays for alteration of the image content.

**As per claim 10: see Ryan on col.5, lines 42-45;** discloses the device, according to claim 8, wherein the rendering unit comprises a random number generator for randomly selecting when to apply the commands.

**As per claim 11: see Ryan on col.5, lines 15-25;** discloses the device, according to claim 10, wherein the random number generator randomly selects when to apply overlays.

**As per claim 12: see Ryan on col.6, lines 48-50;** discloses the device, according to claim 10, wherein the rendering unit comprises a decryptor.

**As per claim 13: see Ryan on col.3, lines 43-45;** discloses the device, according to claim 10, wherein the rendering unit is configured to detect watermarks and to alter image frames in response to detected watermarks.

**As per claim 14: see Ryan on col.3, lines 43-45;** discloses the device,

according to claim 10, wherein the rendering unit detects watermarks and provides a graphical user interface in response to at least one detected watermark.

**As per claim 20: see Ryan on col.3, lines 24-26;** discloses the device, according to claim 10, wherein the device is a digital video camera.

**As per claim 21: see Ryan on col.3, lines 24-26 and col.4, lines 1-4;** discloses the device, according to claim 10, wherein the device is a digital video disc recorder.

**As per claim 22: see Ryan on col.3, lines 24-26 and col.4, lines 1-4;** discloses the device, according to claim 10, wherein the device is a compact disc recorder.

**As per claim 23: see Ryan on col.3, lines 24-26 and col.4, lines 1-4;** discloses the recording device, according to claim 10, wherein the device is a hard disk drive recorder.

**As per claim 24: see Ryan on col.3, lines 24-26 and col.7, lines 49-50;** discloses the device, according to claim 10, wherein the device is a digital tape drive recorder.

**As per claim 25: see Ryan on col.3, lines 24-26 and col.7, lines 49-50;** discloses the device, according to claim 10, wherein the device is a floppy disk drive recorder.

**As per claim 26: see Ryan on col.3, lines 24-26 and col.4, lines 1-4;** discloses the device, according to claim 10, wherein the device is a solid state

memory recorder.

**As per claim 27: see Ryan on col.4, lines 1-4;** discloses the device, according to claim 10, wherein the device is a computer.

**As per claim 28: see Ryan on col.4, lines 1-4;** discloses the device, according to claim 10, wherein the device is a monitor.

**As per claim 29: see Ryan on col.3, line 67 – col.4, line 4;** discloses the device, according to claim 10, wherein the device is a television.

**As per claim 30:**

Ryan discloses digital video content, comprising:

tags for altering image frames by a rendering unit. **(col.5, lines 64-67 and col.6, lines 45-51)**

**As per claim 31: see Ryan on col.7, lines 10-20;** discloses a digital video content, according to claim 30, wherein the tags are for removal of at least one object in a frame.

**As per claim 32: see Ryan on col.7, lines 10-20;** discloses a digital video content, according to claim 30, wherein the tags are for relocation of at least one object in a frame.

**As per claim 33: see Ryan on col.7, lines 10-20;** discloses a digital video content, according to claim 30, wherein the tags are for addition of at least one object to a frame.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**4. Claims 15-19 are rejected under 35 U.S.C. 103(a) as being anticipated by Ryan, et al. (US 6,374,036), and in further view of Rhodes, et al. (US 5,432,900).**

**As per claim 15:**

Ryan discloses a device for protecting digital content, comprising a rendering unit configured to detect tags in a data stream (**col.3, lines 43-45**) and to associate the detected tags with commands for altering image content (**col.5, lines 64-67 and col.6, lines 45-51**). However, Ryan did not include the graphical user interface.

Rhodes discloses application software interfaces with system software through a graphics application program interface (API), a video API, and an audio API (col.2, lines 46-48). Therefore, it would have been obvious for a person of ordinary skills in the art to modify Ryan to include the API as taught in Rhodes because the APIs provide high level functional interface for the manipulation of graphics, video, and audio information (col.2, lines 49-51).

**As per claim 16: see Ryan on col.3, lines 23-30;** discloses the device, according to claim 15, wherein the graphical user interface provides a data entry block for entry of a key.

**As per claim 17: see Ryan on col.6, lines 25-29;** discloses the device, according to claim 16, wherein the rendering unit is configured to down sample in response to a failure to enter an acceptable key.

**As per claim 18: see Ryan on col.4, lines 62-64;** discloses the device, according to claim 16, wherein the rendering unit is configured to disable recording in response to a failure to enter an acceptable key.

**As per claim 19: see Ryan on col.3, lines 15-18;** discloses the device, according to claim 16, wherein the rendering unit is configured to randomly alter the selected frames in response to a failure to enter an acceptable key.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LEYNNA T. HA whose telephone number is (571) 272-3851. The examiner can normally be reached on Monday - Thursday (7:00 - 5:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Vu can be reached on (571) 272-3859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
